- HTML
- CSS
- UI/UX design
- Python
- PostgreSQL
- FastAPI
- java Script
- Github
- React
- Node.js
- Express
- Mongo DB
- Problem solving
- Communication :
(A2 ELEMENTARY)

PROJECTS:

[Root to reuse:](#)

A full-stack web application to manage Volunteer details. Frontend: HTML, CSS, JavaScript Backend: FastAPI Database: PostgreSQL Features: Add, update, delete, and view products records

[Foody:](#)

Designed and developed a static landing page using HTML and CSS. Created clean layouts and user-friendly design focused on responsiveness and readability.

[College ERP:](#)

Built a MERN full-stack College ERP application with modules for score tracking, notice updates, and study material sharing between teachers and students. Designed a multi-interface system enabling efficient communication and data management; GitHub link attached.

Achievement:

Completed a [MERN Development course certification](#) from Udemy, gaining hands-on experience in building full-stack web applications.
